

Safety and Environmental Policy

POL-105

Conneq provides engineering, construction, manufacturing and asset management services to the energy, utilities, resources, industrial, transport and social infrastructure sectors.

We understand that operating in a safe and environmentally responsible manner is fundamental to the continued success and growth of our business.

We value our employees and the environments in which we operate and place the utmost importance on the safety of all persons working or visiting our workplaces and operations.

We commit to:

- Encouraging and supporting a culture whereby all employees may identify, report, assess and control safety and environmental risks in their workplace;
- Establish and review measurable objectives and targets to reduce safety and environmental impact;
- Continuously improving our safety and environmental performance to reduce work related injury, illness and environmental harm;
- Preventing pollution, improving recycling and reducing waste, energy use and greenhouse gas emissions;
- The provision of training to ensure all employees, sub-contractors and labour hire personnel have the relevant skills and knowledge to fulfill their safety and environmental obligations;
- Compliance with all applicable laws, regulations, statutory obligations and other relevant requirements;
- Working with our clients to assist them to achieve their safety and environmental objectives and obligations;
- Ensuring we have the resources and skills necessary to effectively manage our identified safety and environmental risks;
- Maintaining and improving our AS/NZS 4801 (Safety) and AS/NZS ISO 14001 (Environment) compliant management systems;
- Consulting and communicating with our employees on safety and environmental matters;
- Providing information and documentation to allow for effective safety and environmental management.
