

Press Release

Approved for Immediate Distribution
4th February, 2019

AMI Group Welcome i.Power Solutions; New Energy for Mining, Marine and Industrial sectors

The AMI Group are excited to announce the acquisition of the assets of Lendlease Tingira, Cairns business.

IME Solutions Pty Ltd (Trading as i.Power Solutions) are a leader in the design and manufacture of portable substations, switchrooms and modular kiosks for mining and industrial sites. This equipment is designed to meet the rugged demands of operations remote, offshore or underground.

Operations at Cairns include an extensive customer base, with the location in operation for over 30 years of manufacturing, service and production.

Employment has been secured for the majority of employees, and current projects will continue without disruption.

AMI (established 1986) encompass a portfolio of reputable business via their Group of companies, spanning across Australasia and covering specialist supply and service for Leisure and Commercial Marine, Oil & Gas, and Naval Defence.

IME, i.Power's service based arm, are ideally suited to perform switchyard maintenance and installations, repairs, onsite training and equipment upgrades, with many of i.Power's proprietary products designed to accommodate site growth and expansion.

The AMI Group network spans from Vietnam to Victoria and across Australasia, with unrivalled service coverage across major ports. Cairns based customers will now benefit from access to AMI's large agency portfolio including marine electronics, desalination, thrusters and stabilisation products, complete navigation and communications packages, safety equipment and general chandlery.

Lady Loretta Mine Power Station: Design, installation, testing and commissioning of 6MW standby power station and seven portable power kiosks.

George Fisher Mine: 440V Crusher Switch Room

AMI Group offices Australia wide

Head Office: 107 Forysth Street, O'Connor, Western Australia 6163
T: 08 9331 0000 | info@amigroup.co | www.amigroup.co

i.Power's past marine projects include supply of power generation control systems on board Incat Tasmania's 112m Mols-Linien wave piercing catamaran, and works are underway to supply and fit electrical switchrooms on board Hull 089, currently under commission.

AMI Group view this acquisition as strategic in growing their presence in North Queensland to capitalise on future expansion in the area, supporting the growth in the commercial and defence sector of the marine industry. The AMI Group have been long term suppliers to the major ship builders and service providers in Australia including AUSTAL, BAE, ASC and Incat.
